

14-day demo plan

Live money stays off this calendar. If you cannot keep the rules on demo, do not fund live.

Standing rules

One market family for 14 days. One risk percent, written before the session (0.5% or 1%). Daily stop of 2% of the demo balance. Maximum four completed trades per session. Journal every trade.

Days 1–3 · buttons

Open the demo. Learn open / monitor / close. Take only tiny stakes. Write why you clicked, even if the reason is 'curiosity'.

Days 4–10 · one setup

Describe the setup in one sentence a stranger would understand. Do not change it. Fill twenty journal rows. Use the stake planner so the number is not a mood.

Days 11–14 · review

Count broken rules first, results second. The only decision is whether you can run the process again. Funding live is a separate decision and is not required.
